Glossary

| Word or Phrase | Explanation |
|--|--|
| Asset | General support system, major applications, resources, high impact program, physical plant, or a logically related group of systems |
| Asset Register | Location, condition, owner, status, procurement dates, depreciation or values of the assets |
| Audit | Independent review and examination of records and activities to assess the adequacy of system controls, to ensure compliance with established policies and operational procedures. |
| Backup | Copying data to protect against loss of Integrity or Availability of the original. |
| BU | Business Unit- Represents a specific line to the business and is a part of firm's value chain of activities including operations, accounting, HR, marketing and sales. |
| Central Patch Management system | A database where all asset owners will update and maintain current level of patching. It will also check compliance status when it comes to patching. |
| Change Request Form | The change request form is the primary tool used for requesting, approving, and documenting changes to the project and is an important piece of the change management process (here referring to change management procedure) |
| Compliance | Ensuring that a Standard or set of Guidelines is followed. A means of conforming to a rule, such as a specification, policy, standard or law. |

| Word or Phrase | Explanation |
|-------------------------|--|
| firmware | Tangible computing device providing low level of controls, held in non-volatile memory devices such as ROM, EPROM, Flash memory |
| Integrity | The property of safeguarding the accuracy and completeness of assets. |
| Panorama | centralized management system that provides global visibility and control over multiple Palo Alto Networks next generation firewalls |
| Patch Management | The systematic notification, identification, deployment, installation, and verification of operating system and application software code revisions. These revisions are known as patches, hot fixes, and service packs. |
| Test Environment | A controlled Environment used to test Configuration Items, Software Builds, OT/IT Services, Processes, etc. |
| WSUS | Windows Server Update Services |

1. Introduction

This document provides the procedure necessary to maintain the availability and integrity of OT systems and data by applying the latest operating system and application security updates/patches in a timely manner, and to establish a baseline methodology and time frame for patching and confirming patch-management compliance.

This procedure is applicable to all NWC OT infrastructure.

2. Roles and Responsibilities

| Roles | Responsibilities |
|---------------------------|--|
| OT Asset Owner | OT Asset Owner shall have the responsibility of: <ul style="list-style-type: none"> • Determining current version of patches • Determining latest version available from vendors • Initiation of patching |
| SCADA O&M Team | SCADA O&M Team shall have the following responsibilities, not limited to: <ul style="list-style-type: none"> • Provide list of vendor approved windows updates as published by vendor • Provide Timing at which the patching is to be done manually • provide grouping of SCADA systems based on Asset location, Operating System & Installed Softwares for deployment approval • All updates to be deployed using Change Management Process • Update central patch management system |
| OT Admin | OT Admin shall have the following responsibilities: <ul style="list-style-type: none"> • Approval of patch deployment of Windows OS for each group based on validated patches from SCADA O&M Team • Execute the required Actions for patch management as received against Change Request Form in WSUS |

| | Document Type: Procedure | August 16, 2021 |
| | Document Classification: Internal & Confidential | |

3. Patch Management Procedure

Guidance Notes:

- 1: All patch management procedures shall follow change management process.
- 2: Updates/patches must be done after approval of change request.
- 3: updates and patching must be done after establishing backup and recovery mechanism.
- 4: Record of all updates shall be maintained in central patch management system.
- 5: All patching/updates must be done as per OEM and vendor recommendations.
- 6: All patching/updates must be scheduled to reduce operational impact.
- 7: All the updates/patches installed are logged and updated manually in Central Patch Management System whether successful or not.

3.1 Workstations

1. SCADA O&M will update central patch management system with applicable vendor approved patches and updates.
2. SCADA O&M team will initiate change request for deployment and installations of the applicable vendor approved patches/updates.
3. IT Helpdesk will create backup and recovery mechanisms.
4. OT Admin will push applicable vendor approved Windows patches to OT workstations using WSUS.
5. IT Helpdesk install/implement patches for Workstations.
6. IT Helpdesk shall restore OT workstations to its original state in case of major failures by any restoration mechanism adopted in step 3.
7. IT Helpdesk shall update central patch management system with current status of patching activity.

3.2 Servers

1. Infrastructure Team initiates the request for approval of patches/updates on OT servers after receiving the list of vendor approved patches/updates from SCADA O&M team.
2. Infrastructure Team will create backup and recovery mechanisms.
3. OT Admin will push applicable vendor approved Windows patches to Servers using WSUS.
4. Infrastructure Team will Install latest patches on Physical and virtual servers.

PROPRIETARY NOTICE

THIS DOCUMENT CONTAINS INFORMATION PROPRIETARY TO NWC. ANY DISCLOSURE OR USE THEREOF IS EXPRESSLY PROHIBITED EXCEPT UPON THE WRITTEN PERMISSION OF NWC.

| | Document Type: Procedure | August 16, 2021 |
| | Document Classification: Internal & Confidential | |

5. Infrastructure Team shall restore OT workstations to its original state in case of major failures by any restoration mechanism adopted in step 3.
6. Infrastructure Team shall update central patch management system with current status of patching activity.

3.3 Network Hardware/Devices (Routers, Switches, etc.)

1. Network Team initiates the request for approval of firmwares on network devices
2. Network Team will create backup and recovery mechanisms. Network Team must take backups.
3. Network Team will upgrade firmware of network devices.
4. Network Team shall restore OT workstations to its original state in case of major failures by any restoration mechanism adopted in step 3.
5. Network Team shall update central patch management system with current status of patching activity.

3.4 Level 0-1 Device Firmware Updates

1. Smart Operations will create backup and recovery mechanisms.
2. Smart Operations will Upgrade firmware of Level 0-1 device.
3. Smart Operations shall restore OT workstations to its original state in case of major failures by any restoration mechanism adopted in step 3.
4. Smart Operations shall update central patch management system with current status of patching activity.

3.5 Standalone Systems

1. Standalone systems in OT environment will be segregated upon the type, as follows:
 - a. Laptops/ workstations
 - b. Network devices
 - c. Level 0-1 devices
 - d. Servers
2. A list of vendor approved windows update as published by the vendor will be obtained from SCADA O&M team.
3. OT Admin will be responsible for pushing the patches/updates using approved medium.
4. IT helpdesk will take backups and install the updates/patches on the assets.
5. The Respective OT Asset Owners are given as:
 - a. If windows machine (Workstations) SCADA O & M team will initiate request for updates/patches.

PROPRIETARY NOTICE

| | Document Classification: Internal & Confidential | |

- b. If servers, Infrastructure team
 - c. If Network devices, Network team
 - d. If Level 0-1 devices, Smart Operations team
6. In case of any failure during patching process, backup and recovery is implemented, already documented, and communicated to OT Asset Owners.

3.6 Process

| Activity | | Procedure |
|-----------------|--|--|
| 1.1 | Current and latest update/patch/firmware version determination | OT Asset Owner will determine the current version on the systems and also the latest updates/patches/firmware for vendors. |
| 1.2 | Vendor approved updates/patches/firmware | A list of vendor approved updates/patches/firmware as published by the vendor. |
| 1.3 | Initiate updates/patches/firmware process | OT Asset Owner initiates the process for updates/patches/firmware by submitting a change request form. |
| 1.4 | Change Management Approval | Change Manager will approve the change request form upon receiving the form and evaluates updates/patches/firmware with compliance to Change Management Procedure. |
| 1.5 | Backup and Recovery process | Respective team will create backup and recovery mechanisms. |
| 1.6 | Pushing patches/Updates from Vendor | OT Admin will push applicable vendor approved Windows patches/updates to Servers using WSUS. |
| 1.7 | Implement the updates/patches/firmware | Respective team will implement updates/patches/firmware |

PROPRIETARY NOTICE

THIS DOCUMENT CONTAINS INFORMATION PROPRIETARY TO NWC. ANY DISCLOSURE OR USE THEREOF IS EXPRESSLY PROHIBITED EXCEPT UPON THE WRITTEN PERMISSION OF NWC.

|---|---|------------------------|
|  NWC المياه الوطنية | NWC OT Cybersecurity Patch Management Procedure | Page 13 of 17 |
| | Document Type: Procedure | August 16, 2021 |
| | Document Classification: Internal & Confidential | |

| | | |
|-----|--|---|
| 1.8 | Backup and Recovery process (In case of failure) | If updates/patches/firmware are unsuccessful due to any reason, backup and recovery of the system will be performed with informing respective Team. |
| 1.9 | Close the process | The process will be closed by updating the Central Patch Management System. |

3.7 Patches Updates Frequency

These durations are typical and Stakeholders shall determine frequency of update/patching based on criticality, vulnerabilities, location, and other aspects for every asset in OT Asset Inventory.

| Types of patches | Time Period |
|--------------------------|---|
| Workstations and Servers | Vendor Recommended or 3 months release unless critical update required |
| Network Devices | Vendor Recommended or 1 year release unless critical update required |
| Level 0-1 Devices | Vendor Recommended or 2-3 years release unless critical update required |

4. Exception Handling

1. Exceptions must be approved during the change management process.
2. Risk assessment/Vulnerability will be a part of the change management but subject to approval from CAB.

5. Patch-Compliance Review

1. Patch Management Compliance tracking shall be done using Central Patch Management System.
2. OT Admin shall generate and review patch management/compliance reports at least monthly from the central patch management servers for windows.
3. A central patch management system shall be maintained manually for Level 0-1 and Standalone Devices updates.

PROPRIETARY NOTICE

THIS DOCUMENT CONTAINS INFORMATION PROPRIETARY TO NWC. ANY DISCLOSURE OR USE THEREOF IS EXPRESSLY PROHIBITED EXCEPT UPON THE WRITTEN PERMISSION OF NWC.
